

2000HS S - Version MULTI-PURPOSE HEPA FILTRATION SYSTEM

CEILING MOUNT DESIGN

The 2000HS S-Version is specifically designed to be mounted above or below the ceiling. With a 3/8 inch weld nut located in the four corners of the unit it is very easy to suspend the 2000HS-S.

ATTACH HVAC SYSTEM

The 2000HS S-Version can also be attached to any forced air HVAC system in a partial by-pass configuration.

2000HS L - Version Unique Split-Housing Design Conforms To Any Forced Air Ducted System

MULTI-USE CONFIGURATIONS

The 2000HS L-Version can be attached to any heating/cooling system, 3 tons or larger. The split housing design allows for left hand or right hand installation. It can be used with up-flow, down-flow, attic or crawl space system and...even in a stand-alone configuration. Can be mounted horizontally or vertically.

OUTSIDE FILTERED FRESH AIR

You can introduce, outside filtered fresh air through the 2000HS unit.
